Scintillant® Surgical Light

Light Where You Need It

Scintillant® Retractor

The Scintillant® Retractor is a handheld surgical light assembled to a low profile flat retractor that combines moderate blunt retraction of tissue with bright illumination.

- Retract tissue and provide illumination
- Light easily detaches from retractor
- Non-malleable

Scintillant® Suction

The Scintillant® Suction is a handheld surgical light assembled to a tonsil style suction tip designed to combine efficient fluid aspiration with bright illumination.

- Evacuates fluid and gives moderate retraction
- Light easily detaches from suction
- Aspirates and illuminates

Scintillant® Zip-Strap

The Scintillant® Zip-Strap is a handheld surgical light with straps for attachment. Many opportunities exist to combine bright light with your existing OR instruments.

- Easily enhance many tools in seconds
- Attach to various tools like Breisky, Deaver, and Heaney style retractors.
- A versatile solution to your lighting needs
